Forecast for Monday 27 May 2024

Weather: A similar day to on Sunday and whilst still breezy, somewhat less windy with fewer showers and longer drier spells. Isolated heavy showers are also possible, mainly late morning and early afternoon. Becoming mostly dry from the middle of the afternoon and staying dry into the early evening. Turning damp from around dusk.

Chance of cloud-free hill tops above 600m: 60% at first, increasing to 95% by mid-morning. Falling to 40% from dusk.

Low cloud and visibility: Patches above 700m, generally lifting above all the summits by mid-morning, outside of any showers. Often very good visibility in between showers with excellent air clarity but temporarily moderate during the heavier showers. Locally very poor in any hill fog.

Meteorologist's View

Winds locally 5-10 mph stronger than those in the table above on the highest summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 25 May 2024	0mm	0.2mm	0.6mm

Forecast for Tuesday 28 May 2024

Weather: A damp morning with extensive hill fog and occasional rain and drizzle. Some breaks in the cloud developing through the afternoon, these possibly leading to some heavier showers. Further more general rain is possible by the evening. A windier day.

Maximum wind: South west 25 mph gusting 35 mph.

Chance of cloud-free hill tops above 600m: Less than 10% increasing to 40% from early afternoon.

Low cloud and visibility: Extensive cloud above 300-400m through the morning becoming more broken above 500-600m from early afternoon. Widely very poor visibility during the morning and staying so at higher levels for much of the day but improving to become good at times at lower levels.

Temperature: **Valleys:** Plus 8 Celsius
At 600m: Plus 10 Celsius.
Freezing level: Well above the summits.
